Hurley 24/70 “Hoo-Ha” | Yanmar Diesel | New Furler & Instruments | Offers Invited

Description

We have co-owned Hoo-Ha for the last two seasons, and have enjoyed sailing her on the River Medway. During our ownership, we have invested considerable time in maintaining and improving the boat, including fitting a new Plastimo furling system, installing Clipper Duet instruments, replacing the fuel tank, and servicing the sheet winches.

Currently ashore at **Hoo Ness Yacht Club, Kent** and available for viewing by appointment.

Key Features:

- Yanmar 1GM10 9hp diesel engine fitted in 2006 alongside a new prop shaft and three-blade propeller - less than 150 miles of use since installation
- New Plastimo furling system
- New Clipper Duet depth, log/speed and wind instruments
- New fuel tank
- Two sheet winches recently serviced

Important Note:
The mast base requires repair before the boat can be returned to full sailing service. The boat is therefore being offered as a rewarding project for her next owner, and this has been reflected in the decision to invite offers.

Viewing by appointment at Hoo Ness Yacht Club, Kent.
Offers Invited.
